

BAUS Web App

BY IVO DUKIC

Sections

You can join up to three of the clinical Sections plus Urolink and SAS & Trust Urologists. As a section member you will receive updates and can stand and participate in section elections. Trainee members are automatically members of BSoT.

- Andrology and Genito-Urethral Surgery
- BAUS Section of Trainees [BSoT] Endourology
- Female, Neurological and Urodynamic Urology
- Oncology SAS and Trust Urologists Urolink

Sub-Specialty Interests

- Academic Urology Andrology and Infertility
- Endourology Female Urology
- General Paediatric Surgery General Urology
- Oncology Reconstructive Uro-Oncology

The British Association of Urological Surgeons (BAUS) launched a new web app in June 2024 [1] at their annual meeting in Birmingham. This innovative platform is designed to enhance the user experience for members.

Unlike traditional apps, the BAUS web app is accessible through any web browser, offering a seamless experience across different devices with improved touch navigation. The web app also provides customisable and personalised content curation for BAUS news and resources.

Navigation

Upon logging in with your BAUS credentials, the app's navigation is conveniently located at the bottom of your mobile device. The user interface is simplified into five main sections: Home, Newsletters, Groups, Calendar, and Profile.

- Newsletters: Tailored to your practice based on your selected groups (sections and regions), ensuring you receive relevant updates.
- Groups: Allows you to manage your affiliations with various sections and regions directly through your profile settings.
- Calendar: Displays upcoming BAUS events, which can be filtered by event type, region, or section.
- Profile: Contains links to manage your membership details, including section and region preferences, and provides access to the *BJU International* and the *Journal of Clinical Urology*.

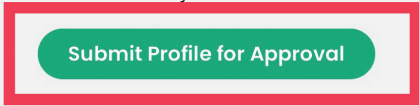

Conclusion

While not revolutionary, the BAUS web app significantly improves the usability of the BAUS website, making vital resources easily accessible with just a tap. It represents a significant advancement in member communication through enhanced personalisation.
